Dear Deputy Karen Wilson,

I strongly believe that people under the age of 18 should not be charged for their doctors' appointments because people of this age do not have enough money to pay for their own appointments and their parents might not either so that makes it a struggle to be cared for.

Each appointment can be ridiculously expensive, especially if they have to go more than once, so children could be suffering at home and we must remember that the UNCRC Article 6 states that all children have the right to survival and development.

Article 2 states there should be no discrimination but that is what is happening right now because some families have to pay for children's appointments, and some don't depending on what their doctor surgery decides. Please make sure that all children have access to free health care.

Thank you for reading my letter.

Yours Sincerely,

Caelan
